

Ikhlaq Ahmad

Dallas-Fort Worth-Metro, TX | (678) 848-5584 | ikhlaq_ahmad1@outlook.com | www.github.com/ikhlaqahmad1

Professional Summary

Computer science graduate with a strong foundation in software engineering, AI/ML, and a deep passion for computers. Seeking an internship/full-time offer to leverage my technical skills and contribute to the development of innovative solutions.

Education

Master of Science in Computer Science | Dec 2025

The University of Texas at Dallas | Richardson, TX

Relevant Coursework:

Computer Vision, Machine Learning, Advance Algorithm Analysis, Natural Language Processing, Programming in UNIX

Skills

- **Coding Languages:** C/C++, Java, Python, HTML, CSS, JavaScript
- **Database:** SQL, NoSQL
- **APIs:** REST, GraphQL using JSON, XML
- **Version Control:** Git, GitHub
- **Frameworks:** Django, Flask, Spring
- **Operating Systems:** Windows, MacOS, *NIX-Based
- **Soft Skills:** Teamwork, Technical Communication, Time Management

Experience

Lancesoft, Inc | June 2024 – Aug 2024 | Dallas, TX

Radio Frequency Support Engineer

- Gather, analyze, and interpret cellular data, preparing reports and documentation of test results for management.
- Collaborated with cross-functional teams to integrate RF testing results into product improvements.
- Calibrate and maintain RF testing equipment, troubleshooting and resolving any issues to ensure accurate testing.
- Analyze network performance using latency, pings, lost/discarded packet(s), among various other parameters.

Projects

All Project(s) available on my GitHub

Deep-Fake Image Detection via Transfer Learning

- The purpose of the model was to detect whether an image has been generated using AI.
- Built a machine learning model on top of RESNet50, a pretrained CNN-model from google with 25+ million parameters.
- The model was trained using the last 25 layers using approximately 65000+ images (69 GB) and 15 epochs.
- The model achieved a F1 and other scores around 95 percent.

Internet Relay Chat Bot

- Built an IRC bot from scratch using Java that displays weather information of any U.S city via zip code/city and state name.
- The bot fetched information from www.openweathermap.org using RESTful API and parses it using GSON library to get the temperature of the city in Fahrenheit.
- The bot also displayed a random activity retrieved from www.boredapi.com if entered any word or phrase that contained "bored" or "fun activity."

Internet Relay Chat Bot

- Built an IRC bot from scratch using Java that displays weather information of any U.S city via zip code/city and state name.
- The bot fetched information from www.openweathermap.org using RESTful API and parses it using GSON library to get the temperature of the city in Fahrenheit.

Certification(s)

- (ISC)2 Certified in Cyber Security (Course Completion)
